Subject index

A

Accountability, 92
Alternating-pressure mattresses for prevention of decubitus ulcers, 67
Anaesthesia, patients recovering from, communication between nurses and, 45
Analgesia, patient-controlled, in postoperative cardiac surgical patients, ward staff attitudes, 74
Arterial blood gases samples, pocket computers in the interpreting of, 196
Autologous blood transfusion, clinical applications and literature review, 30

B

Bereavement, dealing with, 185
Blood gases samples, arterial, pocket computers in the interpreting of, 196
Blood pressure measurement, direct and indirect methods, 111
Blood transfusion, autologous, clinical applications and literature review, 30
Bolus delivery, sudden, 104

C

Cardiac care units/surgical wards
  post-surgical patients in, patient-controlled analgesia with, ward staff attitudes to, 74
  stress/satisfaction/coping in Israeli nurses, 167
Cardiopulmonary resuscitation training, educational aspects, 38
Chaplains, 165, 192
  as a neglected resource, 165
  personal views of intensive care, 192
Children
  humanity combined with technology, 209
  stressors and coping strategies among parents of, 5
Communication between nurses and post-anaesthetic patients, 45
Computers, pocket, haemodynamic parameters and arterial blood gases samples and the use of, 196
Coping
  with bereavement by nurse, 185
  in cardiac care units by Israeli nurses, 167
  by child's parents, 5

D

Death of patient, dealing (by nurse) with, 185
Decision-making process, problems in, 179
Decubitus ulcers, alternating-pressure mattresses for prevention of, 67

F

Family (of critically ill patients)
  of children, stressors and coping strategies among, 5
  needs, 25
  of trauma patients, multidisciplinary group meeting for, 129
Fibrillation, ventricular, secondary to massive myocardial infarction, implantable left ventricular assist device for irreversible, 138

H

Haemodynamic parameters, pocket computers in the calculation of, 196
Heart, *see* Cardiac care units
HIV testing, dilemmas of introducing, 118
Humanity, 12, 209
  with children, combing technology with, 209

I

Infarction, myocardial, implantable left ventricular assist device for irreversible ventricular fibrillation secondary to massive, 138
Israeli nurses in cardiac care units, stress/satisfaction/coping, 167

L

Long-term intensive care, nursing for patients requiring, 124

M

Malnourishment as high as 50%, 205
Mattresses, alternating-pressure, for prevention of decubitus ulcers, 67
Meningococcaemia, acute, 17
Multidisciplinary group meeting for families of critically ill trauma patients, 129
Myocardial infarction, implantable left ventricular assist device for irreversible ventricular fibrillation secondary to massive, 138

N

Nutrition, mal-, as high as 50%, 205

O

Oedema, pulmonary, high permeability, pathophysiology and mechanisms of injury, 79
Orem's self-care model, 100

P

Parents *see* Family
Patient-controlled analgesia in postoperative cardiac surgical patients, ward staff attitudes to, 74
Policy and procedure manual, 200
Pressure mattresses, alternating-, for prevention of decubitus ulcers, 67
Procedure manual, policy and, 200
Psychological support systems, 59
Pulmonary oedema, high permeability, pathophysiology and mechanisms of injury, 79

R

Responsibility, 92
Resuscitation training, cardiopulmonary, educational aspects, 38

S

Satisfaction of Israeli nurses in cardiac care units, 167
Self-care model, Orem's, 100
Social support systems, 59
Staff, ward, attitudes to patient-controlled analgesia in postoperative cardiac surgical patients, 74
Stress in Israli nurses in cardiac care units, 167
Stressors among parents of critically ill children, 5

T

Technology, combining humanity with, with children, 209
Training of nurses, 172
Transport of critically ill, role of nurse, 92
Trauma patients, critically ill, multidisciplinary group meeting for families of, 129

U

Ulcers, decubitus, alternating-pressure mattresses for prevention of, 67

V

Ventricular fibrillation secondary to massive myocardial infarction, implantable left ventricular assist device for irreversible, 138
